

GIESSE TWIN FINGER CATCH

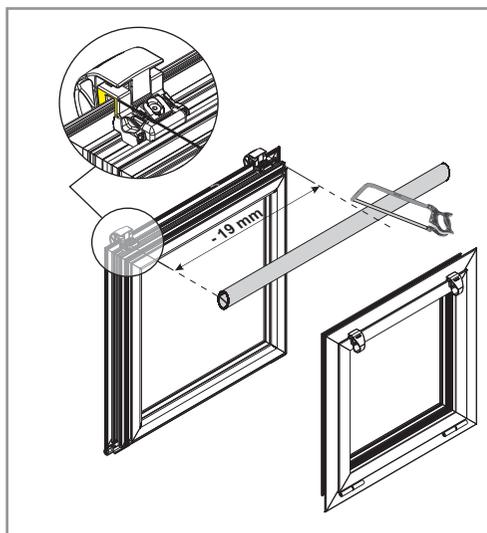

MODERN DESIGN, EASY AND QUICK TO INSTALL

TWIN PLUG

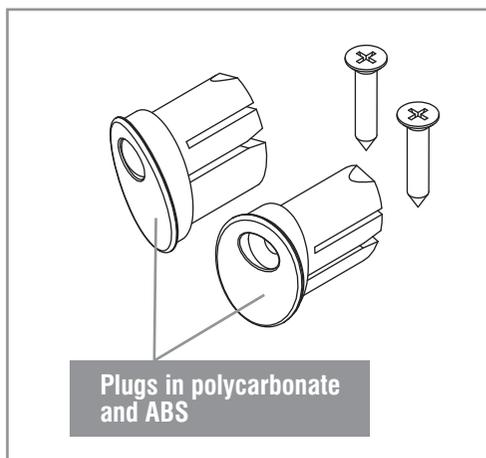

Plugs are available for the TWIN catch which, on bottom-hung windows with several catches, in conjunction with the GIESSE panic bars, enables simultaneous closing and fixture of the bars to the catch.

The plugs are available in the black 500 finish, but can be finished by the final client in all colours of the TWIN catch range.

These are used in combination with the TWIN catches for Euro groove 01704 and for R40 01706.

Application on TWIN catch

Plugs in polycarbonate and ABS

Code	Description	Box
02317500	TWIN bar closing plugs	10 cp

GIESSE TWIN FINGER CATCH

MODERN DESIGN, EASY AND QUICK TO INSTALL

Giesse realized a new finger catch with a modern design, easy and quick to install.

Euro groove version is ready to cover all the profiles with step from 7 to 10 mm.

The particularity of the R profiles version is the possibility to have a microventilation opening thanks to the profile's geometry.

The fixing is very easy and quickly thanks the new system with grub screws.

TWIN finger cath is also available with the AWAY lever. Infact there is the possibility to sell separately the lever and the supports with the following advantages:

- Have the lever in raw finish and print by the customer;
- Remove the lever, once installed the finger catch, to avoid the opening of the window by someone else.

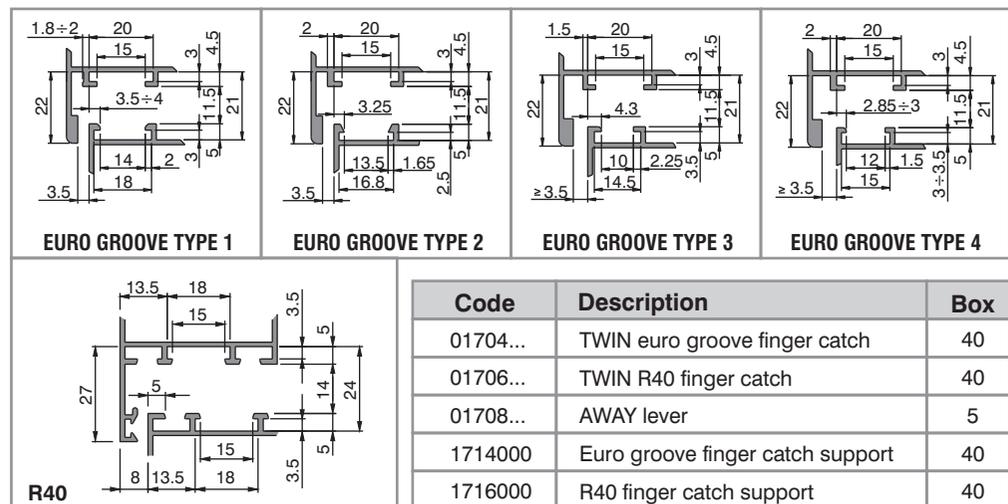

TWIN is available with the following finish:

- 372 Silver
- 410 White
- 500 Black
- 430 Pearl white
- 000 Raw

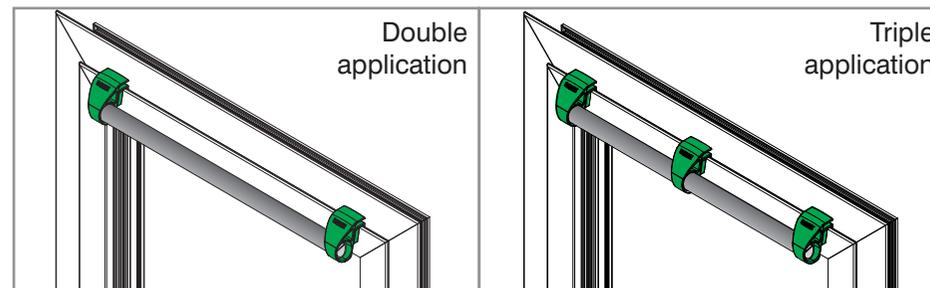

The polycarbonated lever permit only the main RAL finish.

The AWAY lever permit the customer to paint the finger catch itself. It's easy to paint and to install too.

Advantages

- Suitable for profiles with step from 7 to 10 mm (Euro groove only)
- Quick fixing with grub screws
- Pressure regulation +2,1/-1,4 mm
- Possibility to connect more finger catch with Giesse antipanic bars

- Available in two versions, traditional and AWAY with removable lever (eg. for use on windows that can be opened only by authorized persons)
