

## TFM - PNEUMATIC PUNCHING MACHINE POLYAMIDE ROD

### Functions

The "TFM" manual punching machines are exclusively intended for professional use and are specially designed and manufactured for processing polyamide profiles.

Online data sheet

### Technical Features

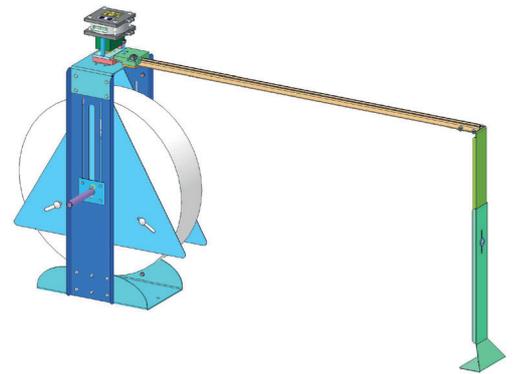

The punching machine is equipped with two processing slots which allow it to process Giesse polyamide connecting rods for Euro Groove (GACS) and ERRE 40.

The punching machine is supplied complete with:

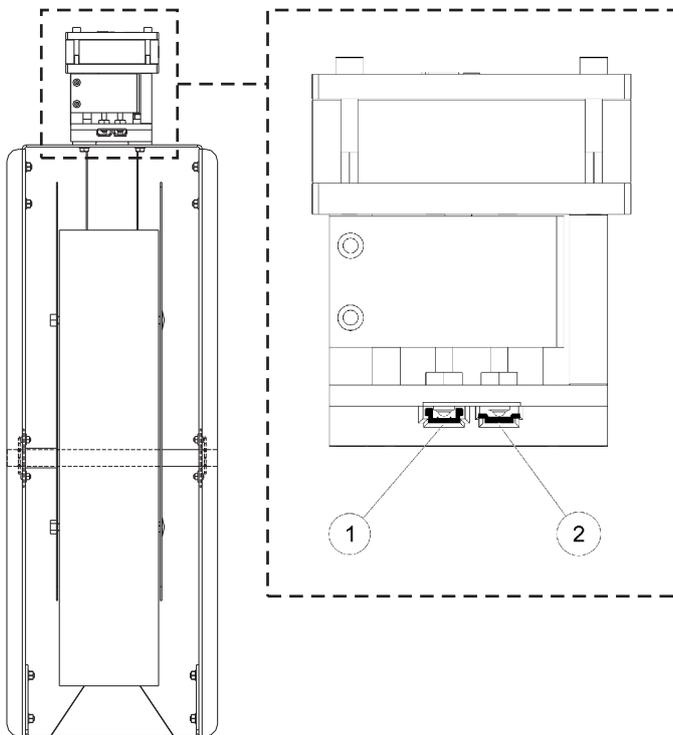

- Support complete with reel
- Millimeter rod for measuring rod length.

The punching machine can only cut the rod and make a double Ø8 mm hole. As it is pneumatic, it requires little maintenance other than lubricating the tools with cutting oil.

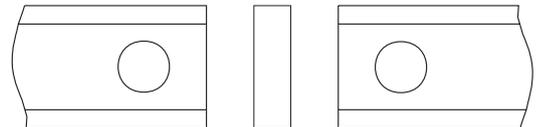

Punching machine complete with support base and reel

Rod machining slots

Processing: cutting and double Ø8 hole

1 - ERRE (03525)

2 - Euro groove (03524)
