REGUITTI

IL MONDO TYMAN INTERNATIONAL DELLE MANIGLIE TYMAN INTERNATIONAL AND THE WORLD OF HANDLES

Grazie alla relazione diretta con i propri clienti e al continuo scambio di know-how con i rivenditori, il product brand REGUITTI ha saputo sviluppare uno tra i più vasti e completi cataloghi del settore in cui sono presenti più di 60 diversi modelli di maniglie per oltre 4.500 prodotti offerti. L'intera produzione made in Italy è realizzata in materiali quali ottone, alluminio, zama, porcellana e comprende maniglie e accessori per porte interne e finestre, porte d'entrata, porte scorrevoli e porte d'hotel suddivise in gamme che rispondono alle molteplici esigenze tecniche e di stile del consumatore.

Thanks to a direct relationship with its customers and the continuous exchange of know-how with retailers, REGUITTI has developed one of the biggest and most complete catalogues in which there are more than 60 different handles models. The whole production made in Italy is made of materials such as brass, aluminum, zamak, porcelain and includes handles and accessories for doors and windows, entrance doors, sliding doors and hotel doors divided into ranges that meet the different technical and stylistic needs of the consumer.

PERSONALIZZAZIONE DEL PRODOTTO

CUSTOMIZED PRODUCT

La soddisfazione del cliente è molto importante per noi e il nostro impegno è concentrato per soddisfare le esigenze dei clienti. Ciò potrebbe includere la possibilità di creare un nuovo articolo in base alle esigenze del cliente.

In questo caso analizziamo la fattibilità e il suo costo per poi aprire un progetto. Ogni personalizzazione di un nuovo prodotto è possibile grazie a ciò che consideriamo il valore più importante, cioè le risorse umane, che a loro volta possono utilizzare le più moderne attrezzature tecnologiche.

Grazie alla nostra flessibilità e capacità di lavorare insieme al nostro cliente, nel corso degli anni abbiamo realizzato diversi prodotti personalizzati che sono stati aggiunti alla nostra vasta gamma di articoli.

Grazie alla tecnologia laser, i prodotti possono essere prodotti con il logo del cliente. (Disponibile su richiesta per quantità da definire con il reparto commerciale).

Customer satisfaction is very important for us and our effort is concentrated to satisfy customer needs. This could include the possibility to make a new item according to customer requirements.

In this case we open a project to study the feasibility and its cost. Each realization of a new item is possible thanks to what we consider the most important value, that is human resources, which in turn can make use of the most modern technological equipment.

Thanks to our flexibility and capacity to work together with our customer, over the years we have realized several customized products that have been added to our wide range of articles.

Thanks to laser technology, products can be marked with the customer's logo. (Available on request for quantities to be defined with the sales department).

MATERIALI MATERIALS

La lega ottone (composta principalmente da rame e zinco) è un materiale duttile, malleabile e ha una buona resistenza alla corrosione, fonde a più di 900°. Reguitti utilizza pani di ottone pressafinato norma UNI EN 1982 ENCB753S. Barra ottone a norma UNI EN12165 CW617N secondo il ciclo produttivo standardizzato.

The brass alloy (composed mainly of copper and zinc) is a ductile material, malleable and has a good corrosion resistance, melts at over 900°. The brass we use is: brass ingots according to UNI EN ENCB753S 1982-2008. Brass bar UNI EN12165 CW617N.

La lega zama (composta principalmente da zinco, alluminio e magnesio) è particolarmente adatta alla pressofusione fonde a più di 400°. Reguitti utilizza lega di Zama primaria di tipo 410EN1774.

Zamak alloy (composed mainly of zinc, aluminum and magnesium) is particularly suitable to casting, and it melts at over 400°. The Zamak alloy we are using is the EN 410 1774 type.

La composizione chimica e i parametri di alluminio estruso sono formulati per consentire la realizzazione di profili con sezione di media complessità, associati ad una accettabile resistenza alla corrosione. Reguitti utilizza estrusi in lega di Alluminio di tipo EN AW-6082.

The chemical composition and parameters of extruded aluminium are designed to allow the production of medium-complexity profiles featuring good resistance to corrosion. Reguitti employs extruded aluminium type EN AW-6082.

Simbolo di innovazione dei prodotti Reguitti Inox ottenuti da materiali nobili e pregiati quali gli acciai inossidabili. Frutto di culture diverse, sostenute da esperienze ed innovazioni, le nostre idee ed i nostri progetti rispondono alle esigenze del mercato in continua evoluzione, risolvendo le sfide che la tecnologia contemporanea ci indica.

Symbol of innovation of the products Reguitti Inox obtained from noble and precious materials such as stainless steel, the result of different cultures, supported by experiences and innovations, our ideas and our projects meet the needs of the changing market, solving the challenges that contemporary technology shows us.

FINITURA PVD

PVD FINISHES

Derivante direttamente dalle applicazioni per l'industria aerospaziale, medica e automobilistica il P.V.D. (Physical Vapour Deposition) è l'unico trattamento finora in grado di offrire un'elevata e durevole protezione superficiale della maniglia al fine di resistere al graffio e alla corrosione. Reguitti garantisce questo prodotto perchè protetto dalle alterazioni superficiali (in normali condizioni di utilizzo) per almeno 10 anni.

The surface of this product has been treated with the new P.V.D. process (Physical Vapour Deposition). This finish protects the product surfaces from atmospheric agents and normal wear. Reguitti guarantees protection from alterations and from superficial abrasion. The aesthetic characteristics will be maintained for at least 10 years (in normal use and cleaning conditions).

Il nuovo ottone rustico

The new rustic brass

L'ottone è da sempre il materiale di prima scelta per la realizzazione di maniglie e accessori, anche grazie alla grande varietà di finiture e trattamenti superficiali disponibili su questo materiale.

Oggi, l'ottone mostra ancora una volta le sue nude proprietà naturali: un materiale trattato solo con acqua e quindi ecologico e completamente riciclabile, resistente alla corrosione salina e all'aggressione degli acidi.

Il nostro speciale AV BRASS™ ha dimostrato proprietà antibatteriche secondo la norma ISO 22196 e proprietà antivirali secondo la norma ISO 21702 (testato contro NL63 Coronavirus umano e Virus dell'Influenza A).

Brass has always been the first choice material for the production of handles and accessories, also thanks to the great variety of finishes and surface treatments available on this material.

Today, brass is once again showing its bare natural properties: a material treated only with water and thus ecological and fully recyclable, resistant to salt corrosion and aggressive acids.

Our special AV Brass™ has been proven to have antibacterial properties according to ISO 22196 and antiviral properties according to ISO 21702 (tested against human NL63 Coronavirus and Influenza A Virus).

La superficie della finiture ottone rustico AV BRASS™ rivela un lato affascinante nel carattere del materiale: una superficie che si evolve e si scurisce grazie alla patina che si forma nel tempo, conferendo alle maniglie diverse sfumature e tonalità dal look vintage.

Consigliamo una regolare pulizia con un panno umido per mantenere inalterate le caratteristiche estetiche e antibatteriche/antivirali del prodotto.

Furthermore, the surface reveals a fascinating side of the material's character: a surface that evolves and darkens thanks to the patina that forms over time and that gives the handles different shades and tones of vintage look.

We recommend regular cleaning with a damp cloth to maintain the aesthetic and antibacterial/antiviral characteristics of the product.

Prima
Before

Dopo
After

La nostra salute inizia da ciò che tocchiamo

Our health begins with what we touch

Le statistiche dimostrano che la contaminazione da contatto con batteri che vivono sulle superfici più comunemente utilizzate è tra le principali cause di malattia. Sulla superficie delle maniglie si depositano batteri che possono portare a malattie più o meno gravi (a seconda del diverso grado di reazione del sistema immunitario coinvolto) fino a provocare la morte nei soggetti più deboli. Nelle cliniche, nelle scuole, negli asili, e in generale in tutti i luoghi privati e pubblici, le maniglie sono continuamente azionate da molte persone. Spesso si tratta di soggetti fragili come bambini, anziani o persone affette da patologie. Sensibilità, responsabilità, sicurezza: prevenire i batteri è una norma igienica di base. Antigerm™ viene incontro alla necessità di responsabilità verso la salute pubblica e quella delle persone che toccano con mano una maniglia.

Statistics show that contamination with bacteria living over the surfaces most commonly used by people is amongst the most common causes of disease.

In public places like clinics, schools and nurseries, door handles are continuously touched by a large number of people every day. On their surface bacteria and germs (more and more resistant to antibiotic treatment) settle and spread. They can be cause of serious illnesses, even leading to death in the weakest subjects.

Sensitivity, responsibility, safety: preventing bacteria is a standard hygienic procedure. The Antigerm™ treatment is the answer to public health responsibility and to the wellbeing of every person that touch our handles.

Z15VM

- Per consentire l'apertura della porta utilizzando l'avambraccio
To allow the door to be pulled open whilst still using the forearm
- Progettato per l'utilizzo con maniglia ZS-SSHF130
Designed for use with ZS-SSHF130 cranked handle
- Viti di fissaggio su maniglia incluso
Secure fixings included
- Finitura in nylon nero
Black nylon finish
- Fornito in coppia
Supplied as a pair

- 19mm diameter tube
Tubolare diametro 19 mm
- Cranked Hands-free lever on rose
Maniglia Hands-free con rosetta
- 53 x 6.5mm round sprung rose
Rosetta diametro 53 x 6,5 mm
- Operated by the forearm
Azionata dall'avambraccio
- Reduces contact with hands
Riduce il contatto con le mani
- Reduces the spread of germs, bacteria, viruses and infection
Riduce la diffusione di germi, batteri, virus e infezioni
- Bolt through fixings included
Viti passanti di fissaggio incluse
- Suitable for 35-54mm doors thickness
Adatto per spessore porte da 35-54 mm

La maniglia Hands-free con rosetta consente all'utente di azionare la leva e tirare o spingere la porta con l'avambraccio o il gomito o spingere la porta con l'avambraccio o il gomito, anziché dover afferrare la maniglia con la mano.

Il design alza l'altezza operativa della leva per aiutare l'utente e, semplicemente appoggiando la leva, questa si aziona e consente l'apertura della porta.

Ideale da utilizzare con il modello ZS-NYHFA per agevolare il funzionamento sia sul lato a tirare che su quello a spingere - sia sul lato a tirare della porta che su quello a spingere

The Cranked Hands-free lever allows the user to operate the lever and pull or push the door open with a forearm or elbow rather than having to grasp the handle with the hand,

The design lifts the operable height of the lever to assist the user, and by simply leaning on the lever it will operate and allow the door to open.

Ideally used with the ZS-NYHFA to allow easier operation on the pull side of the door as well as the push side.

ACCIAIO INOX - STAINLESS STEEL

Z02MS ACCOPPIABILE CON ZP2MS
Z02MS CAN BE PAIRED WITH ZP2MS

- Maniglione stampato
Pressed body
- Azionato dall'avambraccio
Operated by the forearm
- Riduce il contatto con le mani
Reduces contact with hands
- Riduce la diffusione di germi, batteri, virus e infezioni
Reduces the spread of germs, bacteria, viruses and infection
- Può essere installato al posto del maniglione tradizionale
Can be installed instead of or as well as traditional pull handle hardware

I maniglioni devono essere installati con la parte di apertura rivolta verso il bordo anteriore della porta.

La forma del prodotto è progettata in modo che il braccio si liberi naturalmente dal maniglione durante l'apertura della porta.

L'installazione è consigliata a circa 1,5 mt dal livello del pavimento, dove l'azione è più naturale in un punto più alto della porta rispetto alle maniglie standard.

The hands free pulls should be installed with the opening part towards the leading edge of the door.

The product shape is designed in order that the arm naturally moves free from the pull as the door opens

Installation is recommended at approx. 1.5m from floor level where the action is more natural at a higher point on the door than standard pull handle hardware

Totem girevole self-standing

Self-standing turnable display boards

Totem girevole 2 lati 180 x 45 cm

- Totem componibile
- Materiale legno
- Struttura di colore bianco venato e grigio
- Applicazione su pannelli 20x30: maniglie, DK, alzanti e accessori
- Diverse soluzioni

2-sided rotating display board 180 x 45 cm

- Modular display board
- Material wood
- White veined and grey frame
- Application on 20x30 panels: door and window handles, lift and slide, pull handles and accessories
- Different solutions

SOLUZIONE A

Solution A

Cod. **UZZT01ES0L8XXBNLXA**

- 1 lato: 8 pannelli 20x30
- 2 lato: maniglioni
- 1st side: 8 panels 20x30
- 2nd side: pull handles

SOLUZIONE B

Solution B

Cod. **UZZT01ES016XXBNLXA**

- 1 lato: 8 pannelli 20x30
- 2 lato: 8 pannelli 20x30
- 1st side: 8 panels 20x30
- 2nd side: 8 panels 20x30

SOLUZIONE C

Solution C

Cod. **UZZT01ES0SPXXBNLXA**

- 1 lato: maniglioni
- 2 lato: maniglioni
- 1st side: pull handles
- 2nd side: pull handles

Pannelli singoli

Single panels

Pannello singolo 22 x 30 cm

Single panel 22 x 30 cm

- Applicazione n. 2 maniglie in orizzontale o n. 2 DK in verticale
- Application: no. 2 door handles horizontally or no. 2 window handles vertically
