

## CHAMPION PLUS MULTILOCK 0-180

### Functions

Complete system of multi-lock rods (1 to 3 points) for sliding windows or balcony-doors made of aluminium.

Online data sheet

### Technical Features

Available in two versions:

- Backset 15 mm (1 to 3 locking points)
- Backset 15 mm with lock (3 locking points)

All the rods are operated by traditional window handles or recess handles equipped with a 7 mm square pin.

These multi-locks have 3 operating positions:

- 1) 0° CLOSED SASH
- 2) 90° OPEN SASH
- 3) 180° OPEN SASH

The movement of the sash with a 180° handle allows for increased opening (ideal for systems with retractable sash).

NOTE: for the micro-ventilation function, refer to the CHAMPION PLUS LOCKING ROD WITH MICRO-VENTILATION

Depending on the series used, the rods have to be matched with specific coupling kits designed to adapt them to the various shapes of the profile.

The strength of the mushroom nib is greater than 150 kg.

### Materials

Zinc-plated steel lift-proof pin and rods  
Box for rotor and nibs in zamak

## CHAMPION PLUS FIXING KIT

### Functions

The fixing kit is necessary to correctly and durably apply a Champion rod in a specific aluminium sliding system and to obtain the micro-air circulation function.

Online data sheet

### Technical Features

The Champion Plus fixing kit with micro-ventilation is available in 3 versions:

- for 1 point multi-lock
- for 2 point multi-lock
- for 3 point multi-lock

The Champion Plus fixing kit usually includes all those components necessary to apply the fastening rod in a specific aluminium sliding system.

These kits therefore generally include:

- Shims to adapt the rod to the sash profile
- Frame counterplates
- Frame counterplate adjustment shims
- Lift-proof component
- Fixing screws
- Window handle spacer tubes

The rod adjustment shims snap into place, facilitating hardware installation operations.

Depending on the sliding system used, these adapters provide different fixing systems:

- direct to the profile, in which the screw grips directly in the sash profile
- with expansion (patented by Giesse) in which the adapter expands and anchors to the sash profile without the need for drilling

### Materials

Shims for adapting the rod to the profile, counterplate shims and window handle spacers of grey polyamide

Screws for fixing rod to profile in stainless steel

Frame counterplate made of zinc plated steel

Anti-lift component and retractor (where applicable) made of die-cast zamak

## RECESSED WINDOW HANDLE

### Functions

Window handle that is applied on the secondary sash of a sliding casement.

Online data sheet

### Technical Features

Not being top-hung, it allows overlapping the sashes.

Equipped with a 7 mm square pin and a positioner for stopping the handle at 0° and 180°.

The product has its own system for fixing to the stand-alone profile compared to the M5x25 screws fastening the window handle to the internal mechanism. Depending on the shape of the sash profile, the manufacturer will decide on how to prepare the recessed window handle with parts A or B so that the product is anchored in an effective and long-lasting manner.

### Materials

External body, pull handle and fixing components made of die-cast zamak

Square pin and fixing screws in zinc plated steel

Hostaform snap disk

Locking washer made of harmonic steel

## EXTERNAL RECESS PULL HANDLE

### Functions

The external recess pull handle has the function of pulling a sliding sash and works in conjunction with a window handle on the inside of the casement.

Online data sheet

### Technical Features

The external recess pull handle has the function of pulling a sliding sash and works in conjunction with a window handle on the inside of the casement. This article is fitted externally and performs the function of pulling a sliding sash.

This product works in combination with the recess window handle or in combination with the Prima window handle.

The metric screws supplied with the window handle for the inside are screwed into the external recess handle, joining the 2 products with the profile

### Materials

External body and lever made of die-cast zamak  
Zinc plated steel screws
